

Name of the Programme: Internet Awareness Programme

Department: Computer Science

Date: 14-02-2025

Coordinators: Faculty Members of the Department

Participants: Students of Govt. High school, Lakshmipuram, Mysuru

Number of Beneficiaries: 18

Objective of the Programme: The primary objective of this programme is to equip school students with the necessary skills to effectively utilize modern technology in their academic activities. By integrating practical applications, students gain hands-on experience that enhances their learning and prepares them for future academic and professional challenges.

About the Programme:

As part of its community outreach initiatives, the Department of Computer Science of MMK and SDM Mahila Maha vidyalaya, Mysuru organized an Internet Awareness Programme for 8th and 9th standard students of Government High School, Lakshmipuram, Mysuru. The initiative aimed to equip students with essential knowledge about Internet technology and its diverse applications in education, communication and beyond.

Faculty members of the department, along with second-year BCA students, actively participated in training 19 school students, providing hands-on experience and practical insights into navigating the digital world. The session covered the safe and effective use of online resources, enabling students to harness the Internet for learning, research, and responsible digital engagement.

The programme was met with enthusiastic participation and positive feedback, with students expressing their keen interest in learning more about the Internet's potential. They appreciated the *engaging and informative session* and requested similar initiatives in the future.

Learning Outcomes: Through this programme, students will gain practical exposure to essential digital concepts, including:

- Efficient navigation and utilization of web browsers
- Downloading and managing online documents
- Leveraging search engines like Google for academic research and project preparation
- Creating and formatting documents using MS Word with internet-based resources
- Utilizing YouTube for science experiments and other educational purposes
