Green Policy Document on

Environment and Energy Conservation

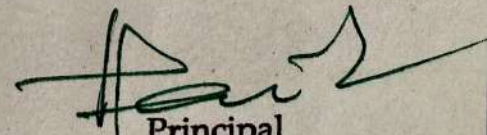

In order to maintain energy and reduce its adverse impact on the environment, our institution places a strong emphasis on energy usage policies and the environment. The policy applies to all stakeholders, the institution as a whole, and the different activities that the organization engages in.

Activities promoting environmental awareness and the green campus initiative are organized by the Science and Nature Club, NSS and the Ranger's unit. The events assist in realizing our duties and obligations regarding the preservation of natural resources.

Policies:

- To save energy, install LED lamps across the institution.
- To restrict the number of outsiders and student vehicles that can enter the campus.
- To implement systematic waste management techniques.
- To implement eco-friendly practices such as reducing energy consumption, minimizing wastes, encouraging recycling and sustainable materials.
- To promote a culture of environmental awareness among staff and students.
- To conserve natural resources such as water and bio-diversity.
- To educate about climate change and sustainability.
- To reduce air pollution, encouraging students and staff to use public transportation, eco-friendly vehicles or through pedestrian friendly roads.
- Increasing the installation of Solar Panels in the campus.
- To reduce global warming, encouraging students to plant the saplings on special occasions.
- As green initiative, the guests will be greeted with saplings.
- To develop medicinal gardens and maintain a green landscape to minimize the carbon dioxide emission level.
- To engage in dialogue with the government agencies, municipal corporations and the affiliating university and actively work with the local organizations in the areas of environment, energy efficiency and sustainable development.

This policy will be circulated to the employees and students and is also made available to all the stakeholders on the institutional website.
