## Workshop Objectives

- Provide Hands-on sessions on 1D and 2D NMR Spectra Data Interpretation using examples
- Understand applications of different types of NMR analysis based on type of biomolecule.

## Proceedings of the workshop

### Introduction:

The Three Days National Workshop on "NMR Spectra Data Interpretation" was conducted from 29th September, 2022 to 01st October, 2022. Prof K Byrappa, Pro-Chancellor of Adichunchunagiri University and former VC of Mangalore University, inaugurated the program on 29.09.2022. Prof. Sainath Malligemadu, Principal, presided the inauguration program in the presence of Prof. N. Bharathi, Vice Principal and Head of Dept. of Physics and Smt. KS Sukrutha, IQAC Coordinator and Head of Department of Computer Science. Dr. Wethroe Kapfo, Head of Department of Biochemistry was the Convenor while Dr. Chaitanya Pandit, Assistant Professor, Department of Biochemistry was the Co-Convenor.

The inaugurator presented on applications of NMR and in his inaugural speech deliberated on the requirement for interdisciplinary research. 49 participants registered and attended the workshop. They included post graduates, research scholars and faculties from KMCH Pharmacy College, Coimbatore, Tamil Nadu; JSS Pharmacy College, Ooty, Tamil Nadu; CSIR-CFTRI, Mysuru; SJCE college, Mysuru; DOS in Microbiology, University of Mysore, Mysuru; Pooja Bhagavat Memorial Mahajana Education center, Mysuru; and College of Allied Health Sciences, Mysuru.

### Theoretical Technical Sessions:

The sessions were presented through online mode.

1. Prof KV Ramanathan, NMR Research Centre, IISc, Bangalore delivered the talk on "Introduction to NMR and its applications". He introduced the history and concept of NMR principle and their applications in structure characterization and medical field.
2. Dr Gaurav Sharma, Assistant Professor, Department of Cardiovascular and Thoracic Surgery, UT Southwestern Medical Centre, Dallas, Texas spoke on "Applications of NMR in metabolite analysis". He elaborated on the application of NMR spectra in clinical studies wherein metabolites within the individual could be qualitatively and quantitatively analyzed. This emerging technique could be useful tool to understand what exactly happens to the metabolites within the body.
3. Dr. Nilamoni Nath, Assistant Professor, Dept of Chemistry, Gauhati University, Gauhati spoke on "Advanced Methods in structural assignment using NMR". He focused on the emerging 2D NMR techniques that are used to characterize a compound.

### Practical Technical Sessions

The sessions were presented through offline mode.

1. Dr. Bettadaiah, CSIR-CFTRI: Introduction to NMR and its applications were elaborated. The resource person further explained how to analyse  $^1\text{H}$  and  $^{13}\text{C}$  NMR using small organic molecules.
2. Prof. Suryaprakash N, IISc, Bangalore: The sessions covered the 2d NMR analysis wherein J coupling was explained thoroughly. NOESY, COSY and TOCSY were explained in detail using small molecules. Also the expert touched upon 1D heteronuclear NMR such as  $^{31}\text{P}$  analysis.
3. Dr. Sachin Chaudhary CSIR-CFTRI: The sessions were a recap of the previous days' activities wherein using small molecules The workshop was a hands- on workshop on understanding NMR spectral data and being able to interpret them.

There were theoretical as well as practical sessions. The entire workshop contributes significantly towards research methodology in spectral research and skill enhancement for data interpretation. The program concluded in a grand note with the presentation of ground breaking discovery on causes for tissue degeneration due to snake venom and the solution for it by Prof. K Kemparaju, Chairman, DOS in Biochemistry, University of Mysore,

PRINCIPAL,

MMK & SDM Mahila Maha Vidyalaya,  
Krishnamurthyparam, Mysuru-570018

Mysuru who was the Chief Guest of the Valedictory Function. Prof. Sainath Malligemadu presided over the function in the presence of Prof. N Bharathi. The program was sponsored by Bank of Baroda, Genespy Research Services, Quantum Infotech and Bioartha Labs Pvt Ltd.

#### 4. Question and answer session:

An interactive and informative question-answer session enabled students to clear their doubts and gain clearer insight into NMR Spectra Data Interpretation.

#### Workshop Outcome

1. The participants were introduced to the principle and diverse applications of Nuclear Magnetic Resonance through online technical sessions.
2. They learnt the method of interpretation of  $^1\text{H}$  and  $^{13}\text{C}$  NMR spectra.
3. The participants were exposed to various 2D NMR approaches of understanding structure of biomolecules.

#### Conclusion

The workshop provided a hands-on experience in handling and culturing drosophila under laboratory conditions. The workshop not only provided extensive practical and theoretical knowledge about drosophila, but it was also successful in inculcating a scientific and research bent of mind in students. The interactive sessions with the experts in the field enabled students to gain newer insights into the biology of drosophila.

To: nsp@sif.iisc.ernet.in

Respected sir

I am Dr. Wethroe Kapfo, Assistant Professor and Head, Department of Biochemistry, MMK & SDM Mahila Maha Vidyalaya, Mysuru. I received your email from Dr. Sachin Chaudhary, Scientist, CFTRI, Mysuru.

I would like to introduce to you briefly about our college. Since its inception in 1990, our college has been striving to provide the best of wholesome education to our students under the guidance of Rajya Sabha member and Padmavibhushana awardee Poojya Dr. Veerendra Heggade, President of SDM Education Society, Ujire. We have been catering to girl students from various social and economic strata of society. Hence the motto "Empowerment of Women to build Enlightened Society". Last year we were accredited by NAAC with "B" Grade.

Regarding the subject, I am happy to inform you that we are organizing a national workshop on "NMR Spectra Interpretation" tentatively from 28th to 30th September, 2022 at our college auditorium. The three days workshop is targeted to Research Scholars and Young Scientists/ Faculties. It has always been a struggle for many of us in analyzing the NMR spectra, and so we've been totally dependent on experts. This workshop therefore is exclusively focusing on NMR Data Interpretation by using simple organic compounds for the benefit of scholars using this technique. We are aiming to touch 1D and 2D NMR data interpretation. Since this workshop requires an expert such your good self, I request you to please consider the invitation and accept it. We will provide for the TA and accommodation also. Dr. Sachin is helping us in finalizing the program schedule. He has already agreed to join us as a resource person. Do let me know the feasibility and we can discuss the schedule comfortable to you accordingly.

With this I thank you for your time and look forward to your response.

With best regards

Dr. Wethroe Kapfo  
Assistant Professor and Head  
Department of Biochemistry  
MMK & SDM Mahila Mahavidyalaya  
Krishnamurthypuram

Dear Dr. Wethroe Kapfo

Thank you for the mail and invitation to be a resource person in your NMR workshop. I am delighted to accept the invitation and deliver couple of lectures on the interpretation of 1D and 2D spectra. I can cover various 2D spectra like COSY, TOCSY, HSQC, HMBC, NOESY, ROESY, J-resolved, etc. Please let me know

1. How many lectures I should give?
2. Duration of each talk
3. What is the present level of exposure to the participants
4. Should the talks focus on basics or advanced experiments?

Nowadays I don't like to travel by public transport considering my age. I hope organisers will encourage me to travel by taxi and retain the same with with me till I return.

Best regards  
Suryaprakash

Respected sir

Thank you very much for accepting the invitation. It is indeed very encouraging. Sir regarding your queries I will be in constant touch with you as we're in the process of finalising the schedule and initiating registration process.

Regarding the transportation we will make the necessary arrangements for your smooth travel sir.

Thank you once again for your response and I look forward to working with you.

Respected sir

I trust this mail finds you well.

This email is in response to your questions.

1. Total of three lectures to be given by you sir:

Lecture 1: COSY and TOCSY

Lecture 2: NOESY and ROESY

Lecture 3: HSQC and HMBC

2. Duration of each talk: 1 h each

3. The present participants will have a basic idea of NMR technique, its applications and 1D NMR.

4. The talks preferably must focus on the basics of experiments.

We have scheduled your lectures for the second day. On the first day 1D NMR will be handled for the participants. Please feel free to clarify sir. Looking forward to working with you.

With best regards

Mon, Jul 25, 2022 at 1:49 PM

To: wethroe kapfo <[wethroe@sdmmmkmysore.in](mailto:wethroe@sdmmmkmysore.in)>

Dear Dr. Wethroe Kapfo

Thanks for the mail. The schedule of my talks sounds good to me. But the HSQC and HMBC should be second talk. After this only NOESY and ROESY has to be discussed. NOESY and ROESY should be talk number 3. Do the participants know about 2D NMR, or should I introduce it? This info helps me in dressing up my powerpoint slides accordingly.

To make it clear, my talks would be on 29th Sept. I will be reaching Mysore on 28th. Leave on the 29th evening, soon after my talks. If delayed, I will leave on the 30th morning.

The accommodation may please be arranged for two nights, 28th and 29th. I will also be coming with my wife.

I will hire the taxi from here, who will directly submit the bill to you, which can be settled directly.

Thanks and regards

Suryaprakash

I would like to introduce to you briefly about our college. Since its inception in 1990, our college has been striving to provide the best of wholesome education to our students under the guidance of Rajya Sabha member and Padmavibhushana awardee Poojya Dr. Veerendra Heggade, President of SDM Education Society, Ujire. We have been catering to girl students from various social and economic strata of society. Hence the motto "Empowerment of Women to build Enlightened Society". Last year we were accredited by NAAC with "B" Grade.

Regarding the subject, I am happy to inform you that we are organizing a national workshop on "NMR Spectra Interpretation" tentatively from 28th to 30th September, 2022 at our college auditorium. The three days workshop is targeted to Research Scholars and Young Scientists/ Faculties.

Since this workshop requires an expert such as your good self, I request you to please deliver a talk on Introduction to NMR on Day 1 through online mode.

With this I thank you for your time and look forward to your response.

With best regards

Respected sir

I am Dr. Wethroe Kapfo, Assistant Professor and Head, Department of Biochemistry, MMK & SDM Mahila Maha Vidyalaya, Mysuru. I received your email from Dr. Sachin Chaudhary, Scientist, CFTRI, Mysuru.

I would like to introduce to you briefly about our college. Since its inception in 1990, our college has been striving to provide the best of wholesome education to our students under the guidance of Rajya Sabha member and Padmavibhushana awardee Poojya Dr. Veerendra Heggade, President of SDM Education Society, Ujire. We have been catering to girl students from various social and economic strata of society. Hence the motto "Empowerment of Women to build Enlightened Society". Last year we were accredited by NAAC with "B" Grade.

Regarding the subject, I am happy to inform you that we are organizing a national workshop on "NMR Spectra Interpretation" tentatively from 28th to 30th September, 2022 at our college auditorium. The three days workshop is targeted to Research Scholars and Young Scientists/ Faculties.

Since this workshop requires an expert such your good self, I request you to please deliver a talk on "Application of NMR in analysis of metabolites" through online mode. We hope to your positive consideration.

With this I thank you for your time and look forward to your response.

With best regards

Dear Dr. Kafco,

Thank you for getting in touch and inviting me to speak at your session on "NMR Spectra Interpretation." Please accept my apologies for the delay in responding; the email wound up in my spam folder, as Dr. Chaudhari informed me.

I gratefully accept your offer to present my talk virtually on the 28th or 30th of September, 2022, ideally between 4 pm to 5 pm Central Standard Time (CST). If none of these times work for you, please feel free to suggest another.

best regards,

-

To: Sachin Rama Chaudhari <sachinnmr@cftri.res.in>, wethroe kapfo <wethroe@sdmmmkmysore.in>

Thank you for confirming the session, Dr. Kapfo. However, it just occurred to me that 4 p.m. here (Dallas time) on September 30th will be 2:30 a.m. in Mysuru on October 1. Because we are in different time zones, could you perhaps recommend times that work for both of us? I will be available either on September 28th or 30th (both per Dallas time-Central Standard Time).

Best,  
Gaurav

Respected sir

Thank you for the information. We will have the talk on 30th September, 2022. We can arrange the timings at 10 am IST or 4 pm IST. It will probably be 11pm-12am or 5-6am respectively, at your place. Is either timings feasible for you sir?

Looking forward to hearing from you.

Respected sir

Thank you for your inputs. The talks can be scheduled accordingly then. Few participants may have a fair idea of 2D NMR, and so for the benefit of everyone it will be good to give an introduction on 2D NMR. 29th September will be the talk. I wanted to know will it be OK for you sir in case we need to postpone the dates by a couple of days. I will confirm it within a day or two.

Regarding the accommodation we'll make the necessary arrangements and be happy to have madam join us as well.

Looking forward to hearing from you.

With best regards

Dear Dr. Wethroe Kapfo

Thanks for the mail. Yes. I will have to introduce 2D. Everyone claims to know 2D NMR, but very few people have understood the concepts of it. I will plan my talk accordingly.

If you postpone the talks by a couple of days, it is ok. But do let me know in advance, so that I can plan my time accordingly

best regards  
Suryaprakash

## REGISTRATION

Date: 15.08.2022 to 19.09.2022

Research Scholars: Rs. 750/-

Faculties/Young Scientists : Rs. 1000/-

Registration covers Registration kit,  
Hospitality and workshop proceedings.

Accommodation will be provided for  
which the participant must bear the  
extra charges.

### Preferable Candidates:

Research Scholars and Early career  
Faculties/Scientists with basic  
knowledge of NMR

### Registration

link: <https://forms.gle/XgcnNvkKkUAFXJX7A>

## About MMK & SDM Mahila Mahavidyalaya

MMK & SDM Mahila Maha Vidyalaya was incepted in 1990 and was taken over in 1992 by the SDME society as the first & only women's college among 56 institutions under SDM Educational Society®, a non-profit NGO dedicated to societal service through education & socio-cultural consciousness.

The vision and leadership of Dharmadhikari of Shri Kshetra Dharmasthala, Padmavibhushana awardee and recently nominated as Member of the Rajya Sabha of the Indian Parliament Poojya Dr. Veerendra Heggade, fulfilling the college motto, "Empowerment of Women to face the Global challenges." It is recognized as one of the premier institutions in India, by India Today, Outlook, Silicon India and NIRF providing affordable quality education to socio-economically challenged students hailing from Karnataka and neighbouring states. The college is UGC recognised by 2(F) and 12 (B) statuses, and was recently accredited by NAAC with B Grade and successfully submitted first year AQAR for second cycle. It offers programs in BSc., B.Com, BBA, BCA and M.Com.

## About the Workshop

The National Workshop on "NMR Spectra Data Interpretation" focuses on the technique of analysing the spectral data obtained after running the sample. The challenge has always been after obtaining the data. As many researchers do not have the fundamentals of understanding the data, they have to depend on experts to help interpret the data. Many times the gap would include the struggle in communicating with the experts as to what was the procedure followed, the standards used and the type of molecules expected. With this, the Department of Biochemistry had organised a workshop on NMR Spectral Data Interpretation in August 2020, successfully through online mode. The response was phenomenal as many researchers from different parts of the country participated. The common feedback was, however, that they wanted more problems to be worked out, which was a challenge due to technical constraints. The department has therefore, decided to organise a similar workshop again, through physical mode for the benefit of the researchers. This way more problems can be solved and more effective discussions and interactions can take place. Through this workshop, the department also will initiate the workshop series on Spectroscopic Techniques to be held every year.

**GeneSpy Research Services**

### GENESPY Goal

To stimulate knowledge transfer and create a supportive environment for research, to ensure a talent pool of students to achieve sustainable economic growth. Further, to fine tune the skill of Life Science students to transform them to Life Science professionals.

GENESPY RESEARCH SERVICES is a specialized Research Service Organization focused on motivating students and accelerating their research work with reality-based program/workshops along with research services with an aim to deliver quality research.

### Research Services

GENESPY will offer a wide range of contract research services to life sciences including microbiology, food safety, and advance molecular techniques of genomics and proteomics.

### LIST OF RESEARCH SERVICES THAT WILL BE OFFERED:

#### ▶ Student training, workshops and seminars

GENESPY will conduct workshops, technical seminars and short-term courses to college students (graduates/undergraduates and research scholars) a hands-on training on various laboratory techniques pertaining to Microbiology, food safety and advance molecular techniques (DNA and RNA) and protein biochemistry.

Research  
Service with  
Affordable  
Price

Training will be offered throughout the year and the duration of the training will vary from one to three weeks based on the program offered. Students will be given participation certificates on successful completion of the course. GENESPY will also allow students to carry out projects on various novel research areas. Project duration varies from one month to one year based on the student's needs. Highly qualified and experienced scientists will provide the necessary guidance to the project students.

#### ▶ Microbial strain identification and characterization

Physiological and biochemical characterization RAPD, RFLP, 16S rDNA sequencing, gene-specific PCR and genetic relatedness with phylogenetic tree construction

#### ▶ Molecular cloning & Protein purification for expression of recombinant proteins

Target gene will be isolated and codon optimized for the expression system. Synthesized gene will be cloned in a suitable expression vector. Sequencing and restriction enzyme analysis will be done to verify the identity of the target gene

The transformants will be screened to identify high expression clones. The expression levels will be studied in micro-titer plates or shake flasks followed by lab fermenters

#### ▶ Protein characterization

Target protein will be purified by basic ammonium sulphate precipitation and advance method of column chromatography.

Physicochemical characterization of purified protein will be done by SDS-PAGE (Coomassie stained and Silver stained), Molecular Weight determination (SDS-PAGE and Mass Spectra), Western Blot analysis (customer supplied antibodies needed) also N-terminal sequencing, MS and MS/MS analysis on special requirements.

Sukrutha, IQAC Coordinator and Head, Department of Computer Science; Prof. Sainath Malligemadu, Principal; Prof. N. Bharathi, Vice-Principal and Head, Department of Physics and Dr. Wethroe Kapfo, Convenor and Head, Department of Biochemistry, look on.*

Mysuru, Oct. 9- The Department of Biochemistry, MMK and SDM Mahila Mahavidyalaya, Mysuru, had organised a three-day National Workshop on 'NMR Spectra Data Interpretation' from Sept.29 to Oct.1.

Prof. K. Byrappa, Pro-Chancellor, Adichunchanagiri University and former VC of Mangalore University inaugurated the programme. In his address he deliberated the need for interdisciplinary research.

The workshop was attended by Post-Graduate students, research scholars and faculties from different parts of the coun-

try. Eminent NMR experts such as Dr. Sachin Chaudhari and Dr. Bettadaiah of CSIR-CFTRI, Mysuru; Prof. N. Suryaprakash and Prof. K.V. Ramanathan of IISc, Bengaluru; Dr. Nilamoni Nath of Gauhati University and Dr. Gaurav Sharma from University of Texas were the resource persons. Prof. K. Kemparaju, Chairperson of DoS in Biochemistry, University of Mysore, who was the chief guest at the valedictory, presented the ground-breaking discovery on understanding the tissue degeneration caused due to snake venom and finding a solution to treat the same.
