Programme Title: E-Waste Management Awareness Program

Date: 11/01/2023 to 13/01/2023

Organized by: Tech Amateur IT Club in association with Science and Nature Club

Objective:

The main objective of this programme is to reduce, reuse and recycle E – waste. Educate and create awareness about E – waste handling that is both safe and environmentally friendly.

Programme Details:

The problem of electrical and technological waste has been widespread in society. Lead, mercury, and other poisons and dangerous substances are produced as a result, and it pollutes the environment. Additionally, in some circumstances, hazardous gases like nitrogen oxide are produced during the disposal operations like as burning and landfilling. The ecology suffers as a result of the major issue with electronic waste disposal. It creates air pollution and releases harmful compounds. E-waste also poses a significant threat to the health of the population. Neglecting electronic waste will have major negative effects on the environment and lives. It is crucial to get rid of electronic waste in a way that is safe for the environment. In this regard the **Tech Amateur IT Club of Computer Science Department** in association with **Science and Nature Club** organized three-day **E-Waste Drive** in the college to give awareness on E-Waste Management through proper disposal of the E-Waste. Students of IT Club and Science and Nature Club collected the E-Waste from staff and students of the college.

Outcome:

Staff members and students both learned the value of proper e-waste management. They took an active part in the program and properly disposed of the E -waste they brought.
