Guest lecture report on

TOPIC: Human Anatomy

Resource person

Ms. Choodamani M S.

M.Phil, Seed Technology.

Date: 11/05/2023

Organised by,

Smt. N Bharthi

HOD & Associate Professor

Department of Physics

MMK & SDM MMV, Mysuru.

Coordinator

Miss Niharika V Jain

Assistant Professor,

Department of Physics

MMK & SDM MMV, Mysuru

Venue: S209, MMK & SDM MMV, Mysuru

Beneficiaries: 09 UG, BBA & B.Com Open Elective Students

INTRODUCTION:

A guest lecture was organized for I BBA & I B.Com students who have chosen Medical Physics as Open Elective.

Here are the objective, Proceedings and outcome of the program.

OBJECTIVE:

The objective of the guest lecture is to provide Open Elective students who have chosen Medical Physics with a fundamental understanding of human anatomy. This overview aims to enhance their comprehension of the human body's structure, which is essential for the application of physics principles in medical contexts.

PROGRAM PROCEEDINGS:

The session commenced with a brief introduction by the program coordinator, who highlighted the importance of understanding human anatomy in the field of medical physics. The guest speaker, Ms. Choodamni then took the stage and began the lecture by outlining the basic components and systems of the human body, including the skeletal, muscular, cardiovascular, and nervous systems. She used detailed diagrams and to illustrate the structure and function of each system. The lecture was interspersed with practical examples of how knowledge of anatomy is crucial for medical physicists, especially in areas such as medical imaging and radiation therapy.

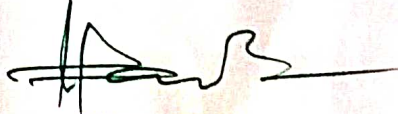

The session concluded with a Q&A segment, where students posed their queries and received insightful answers from Ms. Choodamani. The interactive nature of the lecture ensured active student participation and engagement.

OUTCOME:

The guest lecture successfully provided students with a comprehensive overview of human anatomy, emphasizing its relevance to Medical Physics. The interactive session fostered a deeper understanding and stimulated interest in the subject, laying a solid foundation for their coursework and research in medical applications of physics.
