Proposal letter to conduct a Seven Days Online FDP on "Intellectual Property Rights and Cyber Crime", from 20th to 26th May 2021 by IQAC in association with Diksoochi, Mysuru.

Objectives of intellectual property refer to the purposes of protection granted to creators of innovative intellectual creations. Intellectual property (IP) rights serve the important purpose of ensuring that creators will be recognized for their efforts and protected from infringement. When they are sure that their works are protected, creators are more likely to come up with more new creations. As such, IP also helps to promote creativity and innovation. There are many different forms of IP, each of which is protected by a certain type of IP rights.

Conclusion:

About number of participants were benefited from the workshop.

In many developed countries, the strict enforcement of the IPR role has a **huge contribution to economic growth**. IPR promotes innovation which leads to economic growth. Nowadays every business in the world is the creation of Innovation. ... The impact of IPR is positive as well as a negative impact on the economy.

The law is made for society, not vice versa. All the laws are made for the benefit and betterment of society. Every law has its positive as well as negative effects on society. The Intellectual Property Right law doesn't make the market rigid at the same time dynamic in nature.
